

EIT InnoEnergy **Master School**

Master's in Renewable Energy

Gain a holistic understanding of the renewable energy sector thanks to partnerships between universities, innovation centres, established businesses and start-ups. Combine this knowledge with top-notch business training and real-life projects.

Participating Universities

Master's in Renewable Energy

Second year specialisations

- Solar photovoltaics
- Solar thermal electricity
- Wind energy
- Hydropower
- Ocean and offshore energy
- Biomass and biofuels
- Integration of renewable systems

Degrees and qualifications

After successfully completing the two year programme, you will receive a degree from each of your two chosen universities:

Instituto Superior Técnico. Master of Energy Engineering and Management

KTH Royal Institute of Technology. Master of Science

École Polytechnique. Graduate Degree Programme in Energy Environment: Science and Technology Management

Universitat Politècnica de Catalunya. Master of Energy Engineering

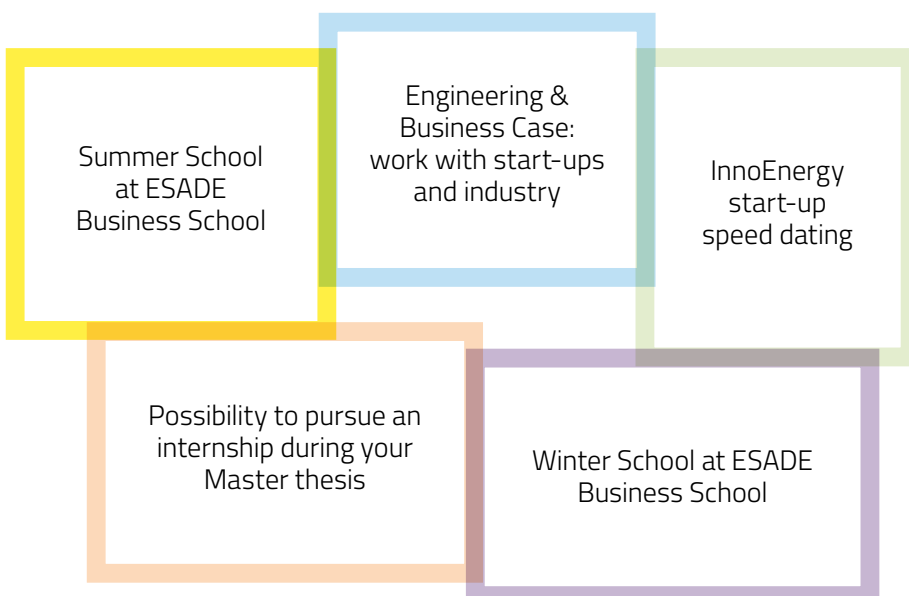

You will also receive a certificate from ESADE Business School and the EIT label certificate.

Who is this programme for?

Graduated students of Bachelor's in mechanical engineering, chemical engineering, electrical engineering, electronics engineering, energy engineering or physics.

Check our website for more specific course requirements.

Innovation & Entrepreneurship Journey

“The InnoEnergy Master programme enables you to explore creative and innovative ways to solve problems and it gives you a good network of like-minded people.”

Ines Prates
