## Publication of the results for the Open Call for Innovative projects

The fuTOURiSME Consortium announces the publication of the results of the Open call for Innovative Projects

This document contains the name of the list of winning projects and projects on the reserve list.

Projects on the reserve list will only be considered if the winning projects will not proceed with the contractual or implementation phases. In such cases, the Consortium will proceed with the selection of projects from the reserve list based on their score, offering them the opportunity to move forward with the activities outlined in the call.

All participants, including the winning projects, those on the reserve list, and non-selected projects, will be contacted directly by the fuTOURiSME Consortium in the coming days, providing an evaluation summary of their projects.

For the winning projects, the communication will include detailed instructions regarding the next steps to follow.

The fuTOURiSME Consortium expresses its appreciation for the commitment and quality of the projects submitted and invites all participants to follow the next steps towards the digitalization and sustainability of the tourism sector.

We invite you to follow fuTOURiSME on [Facebook](), [LinkedIn](), and our [website]() to stay updated on upcoming activities supporting the twin transition of tourism SMEs, including coaching sessions, e-courses sustainability certification actions, and peer-learning workshops.

# Greece
